Design Solutions in Extruded Aluminum

Customer Service...

At Extruded Aluminum, each order is tracked on our automated management system from start to finish. With this system and our around-the-clock operations, we can ensure customers accurate "just-in-time" delivery of even the most intricate custom extrusion orders.

CAD Technology...

Our engineers use advanced CAD technology to design dies and products that meet customers' exact specifications. We also use computer-aided-engineering and analysis software to test material stress and die performance to ensure superior product quality.

Our Mission Statement —

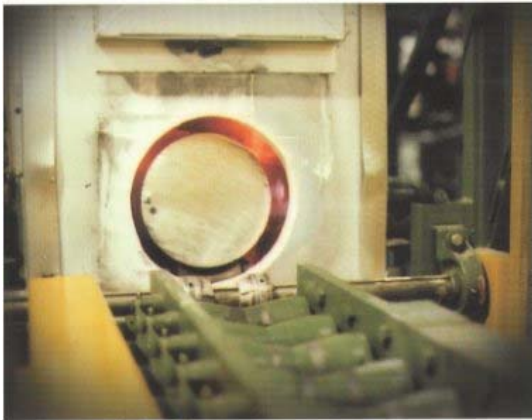

With the highest degree of professionalism, we at Extruded Aluminum will provide our customers with a quality product and the service they need to meet their production requirements. We will continually improve on our quality and process to be competitive and successful, which will allow for the growth of the company and its employees.

Advanced Presses...

Extruded Aluminum boasts state-of-the-art extrusion presses and quenching technologies that ensure computer-controlled pressure, temperature, and dimensional accuracy. Presses range from 1,750 to 2,750 tons, with cross-section capabilities of up to ten inches. These presses allow us to maintain extremely tight tolerances.

Variety In Materials...

We stock a large supply of materials, with billets from seven to ten inches in diameter. If it's not in stock, our suppliers are standing by to ship to us at nearly a moment's notice. Unusual needs and applications never deter us—we enjoy them!

Precision Cutting...

Computer-controlled saws enable us to make precise cuts in lengths ranging from one inch to 48 feet.

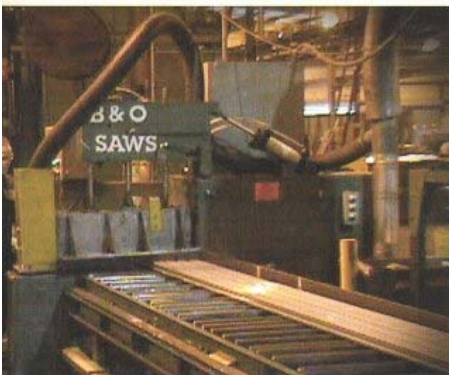

Quality Assurance...

A relentless pursuit of quality is wrapped up in everything we do. Quality is ensured through statistical process controls, dimensional and composition testing, and in-line die inspection and maintenance. We are committed to achieving and maintaining international standards specifications.

Protective Packaging...

Quality extrusions are useless unless they arrive in perfect condition. At Extruded Aluminum, we check every extrusion for blemishes before it leaves the dock. Our innovative packaging techniques provide maximum protection from damage en route.

Get To Know Us Better!

We'd like the opportunity to discuss your extrusion needs and earn your trust. To learn more about Extruded Aluminum Corporation, please call us today!

Ready to Meet the Challenge...

At Extruded Aluminum Corporation, we're always looking for the next challenge. For over 60 years, we've gone out of our way to attract the tough jobs—the projects others shy away from. This outlook keeps our systems, processes, and equipment on the cutting edge.

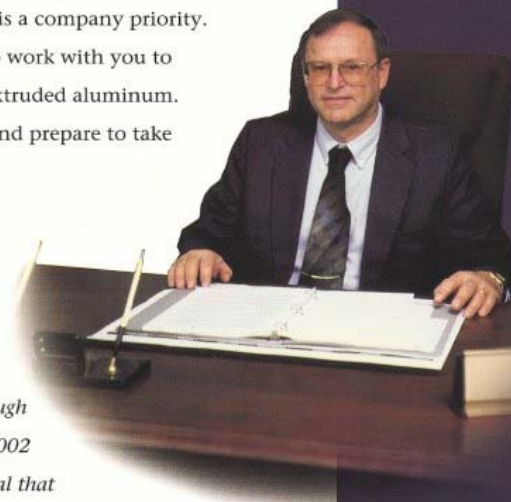

The hallmarks of our work are intelligent designs, durable products, and prompt deliveries—achieved by blending sound expertise with advanced technology.

Extruded Aluminum serves quality-conscious companies in many industries: automotive, industrial equipment, electrical, consumer durables, and construction. Our customers are global firms who demand the best. Because we also expect the best from ourselves, our ongoing pursuit of international standards certification is a company priority.

Our management staff is eager to work with you to create effective design solutions in extruded aluminum. Join us as we move into the future and prepare to take on new challenges!

We at Extruded Aluminum Corporation are committed to the continuous improvement of our process and products. We will achieve this through training and being certified as an ISO 9002 supplier. It is our goal to provide material that consistently meets or exceeds the requirements of our customers and industry standards.
